

Customer Review - Jennifer L., Age 29

I can't say enough good things about this CVS Health pharmacy! As a busy working mom with two young children, convenience and efficiency are crucial for me. The CVS mobile app lets me refill prescriptions and even upload new prescriptions by taking a photo – this saves me so much time. When I arrive for pickup, my order is always ready and accurate.

The pharmacist here, Dr. Kim, is fantastic with pediatric medications. When my 5-year-old needed antibiotics, she took the time to show me the proper dosing and even flavored the medication to make it more palatable. She also provided detailed instructions on timing the doses around meals and school schedules. The CVS Health staff remembers my children and always has stickers ready for them, which makes pharmacy visits much more pleasant.

The store's extended weekend hours (open until 8 PM on Saturdays and 6 PM on Sundays) are perfect for our family schedule. I can pick up prescriptions after soccer practice or during weekend errands. They also stock a great selection of children's vitamins and health products, so I can handle most of my family's health needs in one stop at CVS Health. The automatic refill service ensures we never run out of important medications, and the text notifications keep me informed every step of the way.
