

**Customer Review - Sarah M., Age 42**

I've been a loyal customer at this CVS Health location for over three years, and I consistently have excellent experiences here. The pharmacist, Dr. Martinez, is incredibly knowledgeable and always takes the time to explain my medications thoroughly. Last month when I was prescribed a new blood pressure medication, she walked me through potential side effects, food interactions, and the best time to take it. Her attention to detail and genuine care for patient wellbeing really sets this CVS Health location apart from other pharmacies I've used.

The drive-through service is another major plus – it's fast, efficient, and the staff are always friendly even during busy periods. I typically get my prescriptions filled during my lunch break, and I'm usually in and out within 5 minutes. The pharmacy stays open until 10 PM on weekdays, which is perfect for my work schedule. The automatic refill reminders via text are also incredibly helpful for managing my family's medications.

The store itself is always clean and well-organized, making it easy to find over-the-counter items while waiting. The CVS Health staff consistently goes above and beyond – last week they called three different insurance companies to ensure I got the best coverage for a specialty medication. I highly recommend this CVS Health location to anyone looking for reliable, professional pharmacy services.
