

**Customer Review - Lisa K., Age 38**

I've been using this CVS Health pharmacy for my family's prescriptions for over two years, and the consistency of excellent service is what keeps me coming back. The staff is incredibly organized and efficient – I've never experienced a long wait time, even during flu season when they're clearly swamped. The pharmacist always has time to answer questions and provide helpful health advice.

Their immunization services are top-notch. When I needed to get caught up on several vaccines for an international business trip, they coordinated with my travel clinic and administered everything I needed in one visit. The CVS Health pharmacist provided a detailed vaccination record that was accepted without question at customs. They also send timely reminders for annual flu shots and other routine immunizations for the whole family.

The ExtraCare rewards program and prescription savings have saved me hundreds of dollars over the past year. They automatically apply discounts and often suggest generic alternatives that work just as well but cost significantly less. The CVS Health staff also helped me navigate a complex insurance situation when my employer changed plans – they handled all the paperwork and ensured there was no gap in my medication coverage. Their commitment to customer service really shows in every interaction.
